BRIGHAM'S CITY DIRECTORY AND HISTOny.-This work is now ready for delivery to subscribers and others, and is a credit to the city and the publisher. We have looked through the work and find that it contains much hat is valuable to every citizen of Janesville. The history of the city, by A. T. Gray, Esq., is impartially and ably written, giving as it does all the facts of importance connected with the early settlement of our now flourishing city from the time of Black Hawk war, and following the chain down to the present time, concluding with a general portrait of the town as it now is, and all the business blocks. From the opportunity we have had to examine the list of names we think it is correct, which is any ing a good deal for a directory of a western city. The appendix to the book contains much that is valuable, such as a sketch of each church in the city, all the societies of importance, and closing with a notice of some of our fine private residences. The book is neatly and tastefully printed on good paper and well bound. As a whole it is a credit to the city, and if our citizens buy each a few copies and send them to their friends away, we think it will be a good investment. The printing and bind. ing has all been done here at home and it

be found at Mosely's & Newell's book stores. Price \$1.

As Christmas this year is on Sunday, we believe by common consent that the day following (Monday) will be observed as the holiday. As printers like holidays as well as the rest of mankind, we would give notice to advertisers and others, that there will be no work done in our office on that day; consequently the Gazette will not be A Business bill for General Circulation. published on Tuesday morning.

Non-Explosive Burning Fluid USED WITH SAFETY & ECONOMY. The Best in the Market.

Palmer's Drug and Tea Store. WE have, for several years past dealt largely in BURNING FLUID, and have always, thus far, kept fully up to the times, in any improvements made in its manufacture. Nearly a year ago, in an appeal in favor of its more general use, based upon the fact that the raw material from which it is made, is malely the product of our own farms, we publicly aunounced that there was, at the temperature at which it is generally used, "no explosive power whatever in Burning Fulld,

meet, "no explosive power whatever in Burning Fuld, as now made by those who understand the business in which they are engaged. That injury from its use was either the result of gross carelessness, or of undue alarm caused by a belief in its explosive power," &c. Since then we have manufactured and sold thousand of gallons to consumers in this city and vicinity, and if our assumption was an erroneous one, it would undoubtedly have been discovered ure this.

We are prepared to submit our Fluid to any test the public may call for, satisfied that, with ordinary care, no safer, better or more agreeable light can be produced. As we are indebted to no traveling "Paor, Gaers—Or for the high state of perfection attained by us in its manufacture, we are, as usual, prepared to offer our Fluid at the LOWEST MARKET FIGURES, and to guarantee entire satisfaction in its use, or the money refunded.
